

Specification Sheet:

SECEURO MESH

The clear crime barrier

Transparent security screen available with a perforated steel gauze. SeceuroMesh is a near-invisible protective barrier for vulnerable windows, particularly suitable where an unobtrusive solution is a priority.

SIZE RANGE:

Minimum width: 250mm

Minimum height: 250mm

Maximum width x Maximum height

2300mm x 1295mm or

1295mm x 2300mm

CONSTRUCTION:

FRAME

Description:

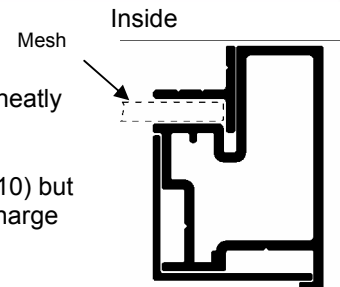

Assembled from three aluminium extrusions the frame neatly and securely holds the screen in place

Dimensions:

35mm wide x 50mm deep

Standard colours:

As standard the frame is powder coated white (RAL 9010) but can be powder coated any RAL or BS colour for a surcharge

SCREEN - MESH

Description:

2mm thick galvanised steel sheet with a matrix of perforations which provides 60% vision

Standard colours:

Powder coated black (RAL 9005)

INSTALLATION OPTIONS:

Extremely versatile SeceuroMesh can be reveal or face fitted onto many different surfaces both internally and externally.

LPS 1175 compliant

The installation will only comply with LPS 1175 if the product is fitted to steel, brick, concrete or hardwood timber.

Non compliant

The SeceuroMesh can be fitted to softwood, aluminium or plastic windows and doors but the installation will not comply with LPS 1175.
